Wonderful, hope to get orcs soon!! . Pretty cool in VR it's like being inside the microscope.

Vive controller support is good which wasn't clear from the video.
Transition effect may be nauseating.

you can choose different paths which gives a sense of exploration

Needs more content.. First impression was very good. The jet pack game play felt fun kind of like having a plane on you at all times.

You can use your jetpack to juke directions in combat. The sniper rifle I picked up came with a scope and range finder.. I actually enjoy this game. Think of it as a first person dinner dash but with slight horror elements.. Weird.
I wanted this to be really bad, but it's not.

It actually has some thought put into the puzzles.

The whole thing is just weird. At 71 cents, it is definitely worth your time.

<https://www.youtube.com/watch?v=l7LSTFGTQSw&feature=youtu.be>. Actually Really Fun get it :) and its cheap good game 10/10. This was an ok DLC.

The missions were fairly inventive and the story of it was pretty funny. They have a new voiced character to play a good fairy in a land of fairytales. A lot of humor and references to stuff like 3 little piigs, red riding hood, etc.

The mechanics of the levels were fairly neat to play, they wern't too hard but the first level can be a bit rough to play since it doesn't give you much to start with vs the main game levels while throwing things at you a lot faster.

Overall i can recommend it for a few bucks,. The first Zuma marked my gaming carreer. A fantastic game overall.. It's funny game but funny weird, pigs poop out meat and bears in gift box..

It would be even better if it wont crash all the time :':c

If not for the crushes I would of recomended it

Nice and chill game! :D. Awesome and somewhat straight forward Tower Defense, DEFINITELY worth the \$1 sale price. I'd honestly pay up to \$5 for this, though the normal \$10 is a bit too much unless you're a huge Tower Defense fan.

As a new VR player, one thing I have struggled with a lot is glide movement. In this game, you move around by holding the movement button and moving your hand/the controller in physical space, so you can actually control the exact speed you move! It's very intuitive and newcomer-friendly, and much appreciated!

The gameplay is pretty much what you'd expect. Several tower types with multiple (2) upgrade paths each, and you place them around a path that enemies come through. However the way you select and place towers, using a specialized type of controller in your off hand, works really well and helps give the feeling of this not just simply being a Tower Defense VR port. It's very much made for VR, with a cool Tron-esque visual style, great retro music, and simple but artistically relevant and nice looking enemies and towers.

Would definitely recommend this for up to \$5, and I expect it will take at least 2 or 3 hours if not several more to play through all the levels and challenges and such

My ONLY complaint is that I can not seem to scale up/down. The options display controls clearly, but I think I'm missing something.. I'm sure I'll figure it out eventually, and the fact that it's a feature only further bolsters this game's fun and value. pessimo gameplay.... Definitely one of the must haves in VR, if you have any respect for arcade games you must buy. The music is great, certainly adds a massive amount of intensity and makes you get into it, I felt like a badass not gonna lie. And you can choose between multiple different sound genres, i.e. Alternative, Rock, Epic, etc. For the price it's worth it, I would get it on sale while you have the chance. Also classic.
