Качество: DVDRip MP4 Формат: COOK Имена:Dentis4.5.full.rar Dentis 4.5 Инструкция: The newest update to Dentis is now available and it is called "Dentis 4.5". Dentis 4.5 features more than 150 new effects, a new GUI, and a redesigned toolbox! Overview: Dentis 4.5 is the newest version of the Dentis effects plugin. It features more than 150 new effects, a completely new GUI, redesigned toolbox, new presets, new keyboard shortcuts, etc. The plugin now has a dedicated GUI, which was done completely by hand, so if you have an objection for this, please send us a message and we will fix it! The new GUI has the following improvements: – New Textures! (We added many new textures with sharp and smooth filters) – New Presets! (We created a lot of new presets, so you can save your favorite settings!) – More Transitions! (We added a lot of new transitions with different kinds of filters) – A new GUI! (We created the GUI entirely by hand) – A lot of new key combinations (you can read more about it in the settings) – We fixed some bugs and improved overall stability – We added new options to the filters – We added new settings for some effects – We added a LOT of new toolbox effects (choose from the tools, change the effect, use the effect, use the effects, play with the sliders, start recording, etc.) – We changed the rendering to be faster – We added new samples – We added new 16-bit effects – And much more! And in this version we added one new optional plugin called "SHARPDOWN". SHARPDOWN SHARPDOWN is a sample based plug-in, which allows you to create your own wipe or move effect. With SHARPDOWN you can add various samples to the existing processing chain. These samples will then be analyzed and the results processed by the other plugins in the chain. SHAR 82157476af
